Education

Queen's University

September 2019 – April 2023

Bachelors of Computing (Honours) in Software Design

Kingston, ON

- **Relevant Coursework:** Data Structures, Algorithms, OOP, Operating Systems, System Level Programming
- **Awards:** Ratehub.ca Award in Computing, Dean's Honour List × 2

Experience

Snapchat

May 2022 - August 2022

Software Engineer Intern

Toronto, ON

- Implemented hybrid encryption to secured the sensitive data of over **100 million users** on AWS and GCP
- Created a high-performance microservice using Golang and gRPC, aggregating and processing **1.7 million** daily requests for model training, resulting in improved accuracy
- Enhanced a core user authorization utility, empowering multiple services within the organization with additional functionality and streamlined user authentication

Bonsai

May 2021 - August 2021

Full-Stack Developer Intern

Toronto, ON

- Engineered an external order fulfillment system that has fulfilled over **\$1,600,000** in processing volume
- Added features to React dashboard such as filters, exporting orders as a CSV, and product verification pipeline
- Reduced API load of Node.js + GraphQL backend by **66%** by optimizing frontend queries, improving response times
- Strengthened the platform's security by implementing a comprehensive password reset flow with reset tokens, IP address and Browser validation and integrated Sendgrid's Email API for secure confirmation emails

Bonsai

January 2021 - April 2021

Site Reliability Engineer Intern

Toronto, ON

- Improved monorepo by transitioning to Yarn V2 with local caching, speeding up CI/CD workflows by **18 minutes**
- Reduced Docker build size by over **90%** with multistage builds and parent images resulting in less storage costs
- Automated the deployment of Google Cloud services and the creation of MongoDB clusters using Terraform, effectively saving development time
- Revamped TypeScript + Node.js image API by splitting into microservices, significantly minimizing response time

Projects

Jobby | Golang, PostgreSQL, SQL, Discord API, Webhooks, React, Next.js, TypeScript, Tailwind

- Developed a Golang application that periodically scrapes APIs, gathering software engineering job postings and storing them in a PostgreSQL database
- Integrated with a Discord server boasting over **75,000 members** and a website built with Next.js and Tailwind
- Established a strategic partnership with Simplify.jobs, a Y Combinator (YC) company, to integrate their job postings

Resume Parser | React, Next.js, JavaScript, jQuery, HTML/CSS, Vercel, Redis

- Created web app with over **100,000 page views**, that shows parsed resume information
- Made custom analytics solution using Redis with backend hosted as a Vercel edge function

Course Central | React, Next.js, TypeScript, Chakra-UI, Python, Selenium, MongoDB

- Engineered a Progressive Web and Android app with **4300+ users** and over **40,000 page views**, that allows students to see a course's historical GPA, enrollment data, and leave reviews
- Utilized Python web scrapers to collect, aggregate, and then upload the data of over 850 courses to MongoDB

Forex Trading Algorithm | Python, Jupyter Notebooks, NumPy, pandas, scikit-learn

- Developed a Python trading algorithm that made a **profit of over \$90,000** from an investment of \$10,000
- Formulated ARIMA model to place orders and sells based on correlation between forex and commodities

Technical Skills

Languages: TypeScript, JavaScript, Go, Python, HTML/CSS, Java, Rust, Bash, C, SQL

Frameworks: Express.js, React, Next.js, Svelte, jQuery, Flask, Bootstrap, Gin, Tailwind

Technologies: Node.js, REST APIs, GraphQL, MySQL, MongoDB, Redis, Selenium, Git, MySQL, Postgres

DevOps: Docker, Kubernetes, GitHub Actions, Semaphore CI, Google Cloud, Amazon Web Services, CI/CD, Terraform
